BUILDING APPROVALS

SOUTH AUSTRALIA

JANUARY 1968

SCOPE This bulletin shows in Table 1 the number of "New Houses and Flats" and the value of "New Houses and Flats", "Other New Buildings", and "Additions and Alterations", approved in South Australia from 1962 to January 1968. Details for the same period of number of flats and houses classified by type and of value of new buildings classified by type are shown in Tables 2 and 3.

The statistics relate only to buildings as distinct from the construction of roads, bridges, railways, earth works, water storage, etc. and have been compiled from (a) particulars listed on returns from local government authorities of permits issued to private persons and organizations for building in areas subject to building control, (b) particulars, furnished on the same returns, of building known to be projected or to have started in areas beyond such building control but within the general jurisdiction of such authorities, and (c) details of contracts let or expenditure authorized by governmental and semi-governmental authorities shown on returns furnished by these authorities.

DEFINITIONS VALUE: The values shown represent the estimated cost when completed (excluding cost of land) of new buildings and of additions and alterations to existing buildings. Alterations and additions of \$10,000 and over to existing buildings are recorded as "new buildings".

PRIVATE AND GOVERNMENT: Building is classified as "private" or "government" according to ownership, e.g. the majority of homes built by government housing authorities are classified as "government" even though some are intended for sale on completion.

COMMENT For purposes of comparison it should be borne in mind that the volume of building approvals can be considerably affected from month to month by the incidence of large projects such as blocks of flats, hospitals, multi-storey office buildings, etc. Also, because of administrative arrangements of governmental authorities, only annual figures for government housing contracts let are really meaningful.

During the three months ended January 1968 the number of houses and flats approved for private owners totalled 1,638, a decrease of 208 from the figure of 1,846 for the previous three months but 46 more than the 1,592 approved during the three months ended January 1967.

The value of other new buildings approved (private and government combined) was \$27,157,000 which was \$7,236,000 more than for the previous three months and \$19,166,000 more than for the three months ended January 1967.

The value of all buildings and alterations and additions approved was \$44,412,000, an increase of \$3,610,000 on the figure for the previous three months and \$19,785,000 more than for the three months ended January 1967.
